Date: 11/27/2006

Dear Don:

As Manager Systems Administration and Support for Pi Media Ltd., a St. Joseph Communication Company, I am pleased to provide Otec Solutions with a testimonial letter.

Pi Media Ltd. first became involved with Otec Solutions in 1995. Numerous initiatives including Page/Sku based Digital Asset Management System and workflow, provided me the opportunity and experience to comment overall on Otec Solutions products, services and most importantly its people.

Quite simply Pi Media could not be more pleased with Otec and the relationship between our companies. Our latest project, Systems and Networking Upgrades, were delivered on time, implemented smoothly and is delivering much better results than originally anticipated.

I recommend Otec Solutions products and most importantly the Otec Solutions team to any prospective client and would be pleased to share my experiences with others. Our relationship with Otec Solutions is more like a partnership. I have peace of mind whenever we require support or consultation, that the Otec team will respond and resolve issues in a timely manner. This includes working alongside them on long and short term technology goals as well as budgeting accordingly to meet the desired goals of our business and our company.

Yours Truly,

Jim Mellanis
Manager Systems Administration & Support
